Oggetto: Naturist beach concession – Lido di Dante, Bassona beach

My name is I was
born in on
and I live in

I always come to Lido di Dante because it is a naturist beach, but I was informed that this year the concession has not been renewed.

I would like to ask you to think back to this decision, for many reasons which I will try to explain. The naturist community is composed of thousands of people (italian people, but most of all foreign people) who visit your sites during the summer only because of the presence of the naturist beach. Naturists are very respectful of nature, and they have always worked to respect sand dunes and to keep the beach clean, moreover the presence of naturists drives away all these ambiguous people who attend the Bassona Beach but are completely absent in the naturist part.

The renewal of this concession would give importance to Ravenna Municipality, because in this way it would be one of the few italian municipalities similar to other European countries, and it would be the first one which puts into effects the regional law no. 26/2006 for the “Valorization of the naturist tourism”.

Moreover, this concession would permit to naturists to call the security agents in case someone does not respect the environment (sand dunes, beaches and pine forests) and the rules of social living, helping them in driving away those who have nothing to deal with Naturism (voyeurs, exhibitionists, and others) who bother people on the beach.

For all these reasons I ask you to think back to this decision and to renew the concession for Naturism in the beach of Lido di Dante.

In particular, I would like to express what I think:
